

NOTICE OF ROAD WORKS AND MOVING CLOSURES

Date: May 20, 2026
To: Property Owners, Residents, Utility Providers, Emergency Services and Businesses within the Road Occupancy Limits
Project: MPH 2026 ENG – Victoria Street/ Toronto Road
Schedule: Late May 2026 through November 2026

Dear Property Owner, Resident, Service Provider or Business Owner,

Henderson Group is providing this written notification to advise that road reconstruction and utility installation works are scheduled to begin at the end of May 2026 and continue through November 2026. This notice is being provided to property owners, residents, utility providers, emergency services and businesses located within the road occupancy limits of the work.

The work will proceed in stages. As crews install utilities and complete related road work, there will be moving closures and changing traffic control locations within the project limits. Traffic control signage, cones, barricades and flagpersons will be used as required to direct vehicles, pedestrians and services safely around the active work areas.

Access to properties and businesses will be maintained where reasonably possible. Short-term delays, temporary driveway restrictions, parking restrictions, sidewalk adjustments and localized noise, dust or vibration may occur as the work progresses. Any planned utility service interruptions, if required, will be communicated separately in advance whenever possible.

We ask for your patience while we improve Port Hope's streets and complete this work in our hometown. Henderson Group will make reasonable efforts to minimize disruption, maintain emergency access and keep affected properties informed as construction moves through the area.

What to expect during construction:

- Moving lane or road closures and temporary traffic delays
- Utility installation, road reconstruction and restoration activities
- Construction vehicles, equipment, noise, dust and vibration
- Temporary changes to parking, driveway access, sidewalks and pedestrian routes

Emergency and Project Contacts

For Emergencies	Call 911 immediately
Project questions	Stephen Henderson, Project Manager 905-885-1939
Urgent construction concerns / emergency line	905-396-4616

Thank you for your cooperation and understanding.

Sincerely,

Henderson Group

205 Peter Street, Port Hope, ON L1A 3V5
