Re: 01-ENG-2026
Municipality of Port Hope
Toronto Street and Victoria St Infrastructure Improvements

Dear: Owner or Occupant,
The Municipality of Port Hope has contracted the services of Henderson Construction to perform watermain road reconstruction on Victoria St S. from Rideout St to the end of the cul-de-sac, and on Toronto Rd from Fraser St to Rideout St.

Pre-Condition Survey

Due to the possibility of vibration from typical construction activities, **Premises Inspections Ltd.** has been retained to conduct a Condition Survey on properties immediately adjacent to the work. This type of survey is undertaken to protect you as a homeowner, should construction activities inadvertently impact on your residence.

With your permission, Premises Inspections Ltd. would like to set up an appointment to survey the interior and exterior of the dwelling. **The survey will include some notes taking and photos of existing conditions on the interior and exterior of the building.**

Your cooperation in helping us complete this survey as soon as possible is greatly appreciated. The company inspector carries photo identification.

To grant permission to the property; please phone 416-877-1701. Please leave your address, name, number, and availability and we will return the call.

Contacts for this project are:

- Stephen Henderson – Project Manager – Henderson Construction.
(905)-885-1939 ext. 21 stephen@hendersongroup.ca
- Matthew Belton -Engineering Project Coordinator- Municipality of Port Hope (905)-885-2431 ext. 4119 – mbelton@porthope.ca
